

Changing System Selections

When you exit the “Model View”, the “System Status” screen appears and the Project Statuses at the bottom of the screen will display the updated totals.

To exit the “System Status” screen, you have two options:

Option 1: Tap on the yellow arrow on the top left to return to the “System Selection” screen

Once the user exits, you can select another system to track from the list of systems available. If you choose this option, the selection process starts again.

Option 2: Tap on the 3 bar icon on the top left of the screen to exit back to the projects screen
